AutoCAD Crack Keygen can also be used to create engineering drawings or technical schematics. On the AutoCAD website, AutoCAD is described as a "comprehensive solution for working with 2D and 3D drawing, rendering, animation and multimedia". The most recent AutoCAD model is AutoCAD 2014. History AutoCAD can trace its history back to 1982, when Thomas M. F. Gee's graphics-software package AutoLISP was implemented on an Apple II microcomputer running on a Motorola 68000 microprocessor. Gee later purchased the rights to the software and formed a new company named AutoLISP, Inc. This company, later named Intergraph, went on to commercialize the product. In 1985, Intergraph released AutoCAD 1.0, for MS-DOS. In 1986, the first AutoCAD 32-bit version was released for the Apple II, which was followed by the introduction of the "DOSPort" port for MS-DOS computers with an 8086 microprocessor in 1987. In 1988, the Macintosh version was first released for the Macintosh operating system. The 32-bit version of AutoCAD for DOS was initially available for US\$499 and the Macintosh version was available for US\$999. A later US\$1,199 version was introduced for the Macintosh. The price decreased to US\$499 and US\$899 after the release of AutoCAD for DOS version 4 and AutoCAD for Macintosh version 3, respectively. In 1991, an update to AutoCAD, AutoCAD 2.0, was released for both Macintosh and DOS. The desktop versions were initially available only on a special request basis and the Macintosh version was available only in the US. In 1994, the 32-bit version was released for the IBM OS/2 operating system. In 1995, the DOSPort was discontinued, with the first release of the 32-bit version of AutoCAD for DOS 5. This was followed by the introduction of the 32-bit version of AutoCAD for DOS 8. In 1997, the DOSPort was discontinued and the 32-bit version of AutoCAD was released for the UNIX operating system. In 1998, the DOSPort was discontinued, with the introduction of the new 64-bit version of AutoCAD for DOS and a 32-bit version of AutoCAD for Windows.
