Baseball ScoreBook Crack Registration Code PC/Windows

Baseball ScoreBook Crack + Registration Code

Baseball ScoreBook is a cross-platform software utility that was specifically built to help you to create a database which contains information about teams, players and scores of the games. The user interface is not very intuitive, and it might take some time until you get used to working with this tool. Multiple baseball events can be added by specifying the date, time, field, home and visiting team, and by selecting the game type from a preset list (practice, team meeting, workout, pre-season, tournament). The game information area can be edited in terms of date, start time, duration, season, attendance, field, home and visiting team. A new team can be added by providing details about the team name, coach and manager, and you can also pick a logo by uploading a BMP file image from your computer. Moreover, the information about the games and teams can be sent via an FTP server, by specifying the server name, user name and password. The generated results can be either printed or saved to HTML file format. The application provides many configurable parameters that can help you view a whole score sheet, box score with game summary, individual player stats, scatter and pitching plots. You can also add information about team rosters, namely the name and position (e.g. pitcher, catcher, hitter), as well as give details about each player, such as the name, birthday, address, note, city, state, email, and others. All things considered, Baseball ScoreBook packs many useful features for helping you create a baseball database, but unfortunately, since it lacks an intuitive and straightforward layout, it doesn't prove to be so easy to work with this tool. 2.0 08/05/2008 Baseball ScoreBook is a cross-platform software utility that was specifically built to help you to create a database which contains information about teams, players and scores of the games. The user interface is not very intuitive, and it might take some time until you get used to working with this tool. Multiple baseball events can be added by specifying the date, time, field, home and visiting team, and by selecting the game type from a preset list (practice, team meeting, workout, pre-season, tournament).
