You can use it to analyze the html code of the web pages that you visit. The tool is packed with simple and easy to use interface and includes a

Cache Viewer Crack +

Keymacro is a simple application to record macros in Windows. It can be used to record application actions, set up hotkeys, shortcuts or personalize the Windows interface. It supports Macros in the following applications: Windows Desktop Search, Office Productivity apps, System Tools, Windows Vista/Windows 7, Office 2008/2010, Windows Live SignIn, Windows Media Player, Windows Media Center, Windows Mail, Windows XP, Google Chrome, Internet Explorer, Firefox, Safari, Chrome, Opera, and the Windows 7 Desktop Search. Keymacro works on Windows XP/Windows Vista/Windows 7/Windows 8/Windows 8.1/Windows 10. How it works: Keymacro works in background and listens for keyboard input. The duration of the listening is adjustable. Keymacro also supports automatic saving of recorded macros to a text file. Easy setup wizard: Keymacro comes with a setup wizard, allowing you to easily set up macros in just a few steps. It supports recording from the following applications: Office Productivity apps, Windows Vista/Windows 7, Office 2008/2010, Windows 7 Desktop Search, Windows Media Player, Windows Media Center, Windows Mail, Windows XP, Google Chrome, Internet Explorer, Firefox, Safari, Opera and Chrome. Use the menu bar to quickly record any application actions, set up hotkeys, shortcuts or personalize the Windows interface. You can also use the list on the left to quickly check what has been recorded and edit/delete it. Use the right-click menu to copy the recorded keyboard strokes to the clipboard. It can be then pasted in any other application to perform any action on it. Use the mousewheel to easily zoom in and out on the recorded keyboard strokes. Keymacro offers various keyboard shortcuts for faster work, such as Record/Stop, Play/Pause, Delete/Edit, Copy/Cut, View/Edit, Clear/Exit, Search for text in the selected area. View recorded keyboard strokes or current text in any application, then use the F5 function to have them replayed. Learn how to record your macros in the help menu. Easy-to-use wizard: You can easily and quickly set up Keymacro by using the following steps: Open Keymacro, go to the Macros tab and click Record. Click the application to which you want to record, then click OK. Click Yes to the "do you want to record the entered text?" prompt and type 2edc1e01e8

Cache Viewer Crack+

View and extract content from web browsers Cache contents are automatically detected by the tool at startup, so you don't have to click any buttons to make this happen. The objects are organized in different categories by type and web browsers, and they can be accessed from the left side of the main window. Check out thumbnails and save content to your computer You can preview the thumbnails of images and videos, play content via the right-click menu, save files to a favorite location on your computer if you wish to keep the cache, as well as remove items from your hard drive to free up space. Rescans can be performed with one click if any cache-related changes have been made since the last scan. Filters can be applied to narrow down search results if you're looking for a particular object. For example, Cache Viewer can be instructed to ignore images, audio content, flash or video. It can also ignore files smaller than a specific size or which were recorded by the web browser a long time ago. Easy-to-use cache viewer and extractor As far as program settings are concerned, you can modify the default grid and list view of the thumbnail size, as well as prevent the tool from checking for updates. It worked smoothly on the latest Windows edition in our tests, performing scans quickly while having a small impact on the resources usage. All aspects considered, Cache Viewer offers a simple and straightforward solution for viewing and extracting cache files from all popular web browsers, and it's wrapped in an intuitive interface. Cache Viewer is a small-sized application that can be used to extract and view the cache content saved within web browsers. This includes images, videos and flashes stored on your computer during webpage visits. It offers support for Internet Explorer, Microsoft Edge, Google Chrome, Mozilla Firefox, Opera, and other web browsers. View and extract content from web browsers Following a speedy setup operation that shouldn't bring up any issues, the utility gets launched in a user-friendly interface with a neatly structured layout, providing immediately access to the cache. Cache contents are automatically detected by the tool at startup, so you don't have to click any buttons to make this happen. The objects are organized in different categories by type and web browsers, and they can be accessed from the left side of the main window.
