Vor 4 years 7 054 8:08 DOWNLOAD LINK - In this video master class (DIY) I will show you how to make earrings from stones with your own hands. These pearl bead earrings are very popular today. They are bright, original, attractive. They can be worn both at home and at parties, discos, etc. These original pearl-bead earrings can be made quickly enough, and they will look like expensive designer jewelry. In order to make such bead earrings with your own hands, you need very few materials. We will need: - Two pairs of pearl beads - 4x8mm beads - fishing line - Metal beads 4x5mm - 4x8mm bead - clear glue - 4x6 beads - 5x6 beads - Earring clasp with English lock How to make earrings out of beads with your own hands The first thing to do is to thread the metal beads onto the fishing line. Then strand the pearl-inspired beads on the fishing line. After a length long enough for the earrings to be worn over the ears is assembled, you need to fasten the clasp, as shown in the figure. To create ring earrings with your own hands, you need to stock up on a few berry-shaped beads. For one ring, you will need two of them. After the middle of the ring is formed, you need to take the second bead, a little larger. The beads should lie on both beads for symmetry. In the middle you need to make a hole. In the hole is pushed through the second bead. Thus it is necessary to create a second ring, and then connect them together. After that, you need to connect the rings, making them one whole. On the inside of the product, you can make a small hole or just close it with a bead, so that it was not visible. Jewelry made of beads with their own hands: master class To make a bracelet, you need to take three rings and connect them together. To do this, in two of them you need to cut holes for the thread. The third ring should not be used for fixing the thread, but put on the lace. The decoration is ready. The next method is called a "bracelet braid". To make it you will need two rings and a string. Use an awl in one of the rings to pierce two holes. Then string two rings on the lace so that between them there was a distance of about three centimeters. Then insert the lace into the ring, which was not used for fastening.
