FIFA Trainer for Training Modes For the first time in a FIFA game, players can choose to automatically optimize specific match attributes when in Training Mode. The changes will be made to the goalkeeper, dribbler, shooter, set-piece taker and defender attributes as well as the FIFA Trainer. In Goalkeeper training mode, players can choose to activate the FIFA trainer to make the goalkeeper a better defender by altering the goalkeeper attributes to make him more focused on opposition attacks. Players can also use the FIFA trainer to make the goalkeeper more aggressive, focusing more on goal kicks or saves. The FIFA Trainer works by analyzing the situation and making tactical adjustments to optimize the goalkeeper's position on the pitch
