Actually, we were going to say that FIFA is the only soccer game that compares, simply because it games are so numerous that they are a little overwhelming. Thats not to say that theres anything wrong with the game. Its just difficult for new players to know where to start. Thats one of the strengths of Football Manager, because this doesnt happen. Football Manager allows you to build your dream soccer teams from top to bottom, or you can start from scratch in the new Experience Mode. This gives you a good idea of what the gaming experience is like because youre going to be surrounded by players who perform the same way that the real teams do. You can even create your own players. Theres plenty of room to get lost in Football Manager, simply because of the number of aspects of the game, from scouting, to business, and even the actual match-play. There are a couple of subtleties that you can see in the first few games, because youre still playing at a low level, but after that, youre probably going to end up with games where the result is obvious. However, this is true of all simulations, and Football Manager seems to have the most depth and detail in its career mode. Anyway, Football Manager is one of the best games on this list. However, there are other games that are more niche. For example, its possible to get a match against Arsenal for Football Manager. Its possible for you to play for a top Premier League club - or a club in the Bundesliga or Serie A. You can even get a challenge in to play for the very top teams. Thats something unique to Football Manager.
