June 23, 2561 B.C. - yesterday I installed MPLAB X 5.10 and XC8 v2.05 and applied the crack as indicated in the last attached file and changed the compiler options to Free , . Now I do it As a result, I got an error message saying that I installed the VCL for CodeVision. Is there a way around this to compile C files for XC8? I tried opening the source file in Visual Studio, but when I get an error about errors on a line that doesn't exist in the source, I can't find the error. Maybe there is an easier way to compile C code for XC8 The VCL for CodeVision can be viewed and modified here.
