TL-8816 is a 2.4GHz dual-band ADSL2+ modem router for home users. It can simultaneously support one upstream and three downstream connections, with the downstream ports in 10Mbps/100Mbps or 250Mbps/1000Mbps. With a built-in 10/100Mbps Ethernet switch, TL-8816 allows you to share your high-speed Internet connection to multiple computers and devices, with a single connection to your upstream router. The 100Mbps/1000Mbps 4-port RJ45 LAN port can be configured as a Fast Ethernet or a Gigabit Ethernet switch. TL-8816 is a multi-band, dual-mode ADSL2+ modem router, which can support both 2.4GHz and 5GHz WiFi networks. TL-8816 features an integrated firewall, making it ideal for protecting your home network from internet viruses and malware, and offering basic protection against DDoS attacks. TL-8816 allows

access to the Internet by connecting to the upstream router through a web-based configuration interface, and to the home network through a browser. TL-8816 also supports Wi-Fi Direct (Wi-Fi Direct is a direct wireless connection from a smart phone or tablet to a DLNA compatible device without the need of wireless access points.) ADSL2+ Modem Router from TP-LINK - TL-WDR3400 Description: The ADSL2+ Modem Router from TP-LINK allows quick sharing of media and files as well as high-speed Internet access. TL-WDR3400 is a 4 port 2.4G ADSL2+ modem router. It allows you to connect up to 4 users at the same time to share the high-speed Internet connection. Up to two devices can be connected to the modem at any given time. With the built-in 10/100Mbps Ethernet switch, TL-WDR3400 allows you to share your high-speed Internet connection to multiple computers and devices, with a single connection to your upstream router. The ADSL2+ Modem Router from TP-LINK allows quick sharing of media and files as

well as high-speed Internet access. TL-WDR3400 is a 4 port 2.4G ADSL2+ modem router. It allows you to connect up to 4 users at the same time to share the high-speed Internet connection. Up to two devices can be connected to the modem at any

What's New in the?

The wireless router is a common equipment in the home, and without it there is no direct Internet access. The router helps to create a network by allowing other computers to connect and share the Internet. Setting up your wireless router is not hard, and almost anyone can do it. In fact, the wireless router is highly recommended by most of the experts. Before setting up the wireless router, you have to make sure that you use the best wireless router compatible with the device you are going to buy. Setup TL-8816 with router wireless cable. In addition, the ADSL2+ modem router provides a complete set of wired

and wireless solutions for connecting PCs, TVs, printers, and other home network devices to the Internet. ADSL2+ Modem Router from TP-LINK Features The TP-LINK ADSL2+ Modem Router provides a high-speed Internet connection at home. This router has a maximum transfer speed of 340 Mbps, which is a value that is greater than the competition. The ADSL2+ modem router also features a built-in Wi-Fi function and smart router security. Furthermore, the device comes with TP-LINK's Easy Setup Assistant that makes the installation and configuration of your wireless router easier. Furthermore, the router is compatible with advanced security standards, such as VPN, parental control, and QoS. Advantages of TP-LINK ADSL2+ Modem Router Quick Internet sharing The wireless router is the easiest way to share your home connection with other devices. This is because with the TP-LINK ADSL2+ Modem Router, you will be able to share your Internet connection with the entire family without the need for additional wires. Moreover,

the device comes with a Wi-Fi function that will allow you to share your home network with other devices, such as mobile phones and tablets. Fast Internet speed Thanks to the integrated VPN and QoS functions, you will be able to download and upload data at a speed of up to 340 Mbps. Furthermore, the router comes with built-in parental control that will allow you to manage and control the speed of the Internet connection for each user. Intuitive control panel The ADSL2+ modem router is designed with an intuitive control panel that allows you to manage all settings easily. In addition, the TP-LINK ADSL2+ Modem Router provides an easy-to-use interface that can be accessed through the built-in browser. Easy Setup Assistant The TP-LINK ADSL2+ Modem Router comes with TP-LINK's Easy Setup Assistant. In fact, this application was designed in order to assist you in the installation and configuration of your wireless router. In addition, the device provides several guides that will help you in the entire process
