Punk, a long-time UFC fan, went into a detailed interview about the UFC fighter's legacy, saying: "Everyone thought it was a joke to see him. But his ground game is as good as anyone's. I've never really seen him get looked over, but he has to deal with the 'unrealistic expectations.' I think it's hard to be a reality based person in this world." - CM Punk

If we compare these files with the correct.nes or.hdd titles that we find in metadata on youtube.com, we find that they also show the same problem. A: I used Cybernate's necesto packer (64 bit) to pack Nintendo Wii ISOs to speed up the download process. Create a file, let's say pack_wii. Edit this file (just copy it), and change "Nintendo Wii" to "NTSC-U" and "Wii" to "Wii". Then go to youtube.com and hit the download button (For example Metroid Prime Trilogy PAL Wii ROM). And find the file "metroid prime trilogy ntsc iso" with the same name as the one you created, in the folder you downloaded, and select it. You can also drag and drop it to the pack_wii file. After selecting the file you just created, click pack and start downloading! The Nintendo Wii U also has issues with downloading Wii U ROMs and ISO's. My solution is to use Cybernate Packer (64 bit) to pack the Wii U ISO. Create a file, let's say pack_wii. Edit this file (just copy it), and change the Wii U to Wii (do not change Wii). Then go to youtube.com and hit the download button (For example Metroid Prime Trilogy PAL Wii ROM). And find the file "metroid prime trilogy ntsc iso" with the same name as the one you created, in the folder you downloaded, and select it. You can also drag and drop it to the pack_wii file. After selecting the file you just created, click pack and start downloading! Note: For the Wii Wii ISO you will need the subtitle on the Nintendo Wii or the "Games" tab on Wii U dash home screen. Source: I believe the first metroid game have the incorrect PAL-Wii name because they started the series with the PAL games. In other words, the PAL version of game 1 was the first metroid game.
