The aim of this work was to study the pharmacological profile of the isolated rat Nociceptin/orphanin FQ (N/OFQ) receptor and to compare it with that of endomorphin-1 (EM-1) receptor and endomorphin-2 (EM-2) receptor, 2. In competitive receptor binding assays and using [125I]EM-1 and [125I]N/OFQ as radioligands, the pharmacological profiles of the N/OFQ, EM-1 and EM-2 receptors were analysed. A high affinity site (Kd(N/OFQ) = 0.22 nM, Bmax(N/OFQ) = 407 fmol/mg of protein and Kd(EM-1) = 0.32 nM, Bmax(EM-1) = 519 fmol/mg of protein) was observed for the rat N/OFQ receptor. These
