Arduo File Splitter supports the following ways of processing: cutting, merging, comparing, copying, renaming, splicing and removing of a file/folder. The application is portable, easy to use and does not require installing a bulky software on a computer system. Features: * MD5: supports compression, uncorrupted and filtered file/folder * Split files by size and on the basis of file type * Rename files and folders and merge files of different formats * Generate a file/folder comparison report * Export processed files/folders to the USB flash drive * Configurable (self explanatory) System Requirements Windows XP, Vista, 7, 8, 8.1, 10 View more similar software, such as: Portable Hard Drive Duplicator and EaseUs Partition Assistant, available at Arduo File Splitter is the easiest way to split files and folders with the help of the PC. After you have created your first file/folder split, Arduo File Splitter supports all other operations. The most difficult part of any file/folder split is to choose the right file/folder size. You may find that Arduo File Splitter makes your file/folder size automatically, for example, when you open a folder full of several files. Regardless of file/folder size, Arduo File Splitter allows you to select the MD5 file type to create the check file for each split. Once you have run Arduo File Splitter, a temporary file is saved to a temporary folder. In most cases, this temporary folder is the same as the one where the processed files/folders are saved. This file/folder split can be repeated any number of times and the temporary files will be overwritten. The temporary files can be safely removed. When you decide to merge several files/folders, Arduo File Splitter offers two operation modes: on the basis of file type or on the basis of size. You can easily get a detailed report of your processed files/folders that can be saved to the hard drive, USB flash drive, CD or DVD. Arduo File Splitter has an easy-to-
