Chapter 1: What Is Bitcoin? Bitcoin is an innovative payment network and a new kind of money. And is a peer-to-peer payment system that is completely decentralized. The core idea behind bitcoin is to provide a way for people to make payments to each other directly. No middlemen. No chargebacks. No fees. For the average person who uses Bitcoin, the entire process works like this. 1. Pay for something with cash (or a credit card) 2. Track that transaction in a ledger called the blockchain, using publicly-known cryptographic hash functions (as long as you provide proof that you actually bought what you said you bought) 3. When you are finished with the purchase, send the bitcoin to a recipient by entering a wallet address. (You create a unique wallet address for each Bitcoin you own. 4. Wait. The seller now receives and accounts for that bitcoin in his or her own ledger. 5. Continue the process.Q: Find the length of a side of an equilateral triangle if the inscribed circle has a radius of 9 I am struggling with this problem that I can't figure out. I need to find the length of the side of an equilateral triangle if the inscribed circle has a radius of 9. I tried to set the center of the triangle to the origin and then solving the system of 2 equations using the Pythagorean Theorem, but I can't find a solution. A: Let C be a center of the inscribed circle. Denote r the radius of the inscribed
