This soundtrack is based off an RP that I'll be running and a few related songs to my story. This is NOT a game music soundtrack, but an original soundtrack by me. The end credits go over one more piece of original music, by me. I have no experience at this, but will try to make something cool. If I do, I'll post the result here, or in the Original Soundtracks forum here. If anyone is interested in ordering a physical copy of the album, please PM me. The sounds were mostly composed and edited using Ableton. I recorded all the sounds using my iRig Mic. Gameplay in the game is by far the most important part. A few people have taken their instruments and just composed outside of the game to get the main melodies. This doesn't match my style, but can give you an idea of what I'm trying to go for. (Please, before rating this, make sure you have listened to my soundtrack and let me know what you think. I will also edit this thread after people's reviews.) Comments? The answer to that is in your hands... :) I'm looking forward to people enjoying this soundtrack, and to me hearing what you think of it! Hey, you rock. This is, so far, the best soundtrack of Switch I have heard. I can't tell the difference between the different recordings, but I think your singing is really cool and fits the music well. I'll let people figure that out and you know you'll get a lot of likes on your profile when people hear this track. Songs: Change: - 5.27 Ifs & Buts: - 5.35 Gear Up: - 5.37 Bone Crusher: - 5.36 Frontline: - 5.42 Man, I really dig this. Really well done. This is the best soundtrack I've listened to. So very professional and beautiful. This is a good effort, it's quite simply one of the most well-done RPs I've seen to date. Your soundtrack provides the music for a game that I can only describe as hilarious. With that said, there's a lot of very cool music that comes with the comedy of the game, so the music is a great mix of funny and awesome. The "All-Out Attack" song is an especially awesome track

What's new:

X HASH TAG MATCH HANGOVER EON'S SEASON 5 COUNTDOWN All of this and more in The Next Generation, ROBOT 6! In THE NEXT GENERATION, the numbers continue to decline. As the LOADMANIA falls another notch, it's a loss that all of the games can't make up for. The Robo-OPs are being crunched with the same tools that were in their previous counterparts. Each round of NEWGEN is so close, it doesn't matter if one robot loses. I didn't say it before, but at the NPDE, I thought they should use the sick PSP games to compare them to. Worst case, they'll fail. Best case, it'll show us that we can be really good in every genre. No one has that right now. And this year it's Coby Turner and Carl Parisi against Dr. Dave. But I think it'll be closer in this one. Since all the Robos haven't had much practice since REDDAL, they might not make the ROBATIC cut. And Nick Ransom only goes up against the ladder in the pod. But even if we lose the two robodash battles, we still win. Again. It's one step closer to a scheduled council. But tell me, do you remember how we celebrated the one in 2003? The ROCHU 2 controller crapped out after testing. That was the most annoying day of programming for them. It's been avoided, and I'm glad for it. I think it's a minor win for us. I suppose the reason I'm all into games is that I can't move. That makes it tough to sit still. I don't know what it means, but I feel lonely when I have to take a break. The compiler crunches happy. But what's wrong with me? At least I have these friends to fall asleep next to me. They're always there even when I'm asleep. I just have to take time out to rest with them. The countdown actually starts now. I
