. Q: WCF HTTP Error 500.19 - Internal Server Error I have a new Website published on IIS and I am trying to add a service reference to a class from that site. When I click the "Add Service Reference" I get the following: The address is not valid The URL that I copied there does not work - it tells me that the service is down. I was able to add service references in the past without problems. A: Your WCF service is not able to communicate with itself over HTTP because your Web.config file is not configured properly. You will need to update the web.config file and add the following section: ... Also, see this SO post, it might be useful to you. EDIT: To update your configuration, make sure you select "Update Web Site" from the Add Service Reference Dialog. Q: Need feedback for Apify chrome extension I need feedback on my chrome extension developed using the Apify API. I'm new to this process so I would be happy if someone is willing to give some useful feedback on the Apify chrome extension. Would be nice to gather some feedback about: How it works with apify.com? Implementation of

---

the Apify API on my side? Things you'd like to improve. --

Thanks A: I'm glad you decided to share your work with us all. How it works with apify.com? First, please support

the Apify API docs: There is a whole Apify API

Documentation at There is very complex Apify API docs.

Apify provides a rather long list of methods, events, properties etc. in order to assist you with different scenarios. In addition to the Apify API docs there is some good documentation on the Apify docs, and you can find the Apify C# API there. Basically, you can use the Apify API in your chrome extension to perform any Apify API
