This slideshow requires JavaScript. It has been 1 day since I started playing Silver Creek Falls: Chapter 2 and I really enjoy it. There were times when I wanted to quit but I thought about how I started playing it. I bought a copy of the game and my friend recommended that I play it and it really helped me a lot. Not long after I played the game, I started to write. I feel confident now that I am not that bad in writing. Today I decided to write a short story. It would be nice if you read it and give me some suggestions. This story is about my life and how it became like that. My name is Rod. I am 16 and have played this game Silver Creek Falls: Chapter 2. I live in Hawaii and I have 6 brothers and 1 sister. My siblings are: Marc (14) Sean (16) Kane (8) John (13) Joe (11) Tony (12) Brat (10) My siblings, are really different from my personality. Marc is the most like me. He loves to play most of the computer games on the internet. He is a sophist. He is always smart. The games he plays are: Deer Hunter Final Fantasy VII (Japanese) Skyrim (PC) Pokemon Worms Armageddon He is a good guitarist. Sean is the normal one. He is the best at all sports and likes to play. He likes boxing and wrestling. Kane is a good student. He is a nerd. He likes to play video games. He likes "Minecraft". John is the athlete. He is really smart. He likes sports like playing basketball and baseball. Joe has the weirdest personality of all. He is very helpful to others. His favorite food is ice-cream. Tony has a different personality than the others. He is a shy guy. He likes to eat and goes to the

What's new:

Orpiment, also known as arpmment, is a metallic arsenic sulfide (As_2S_3) and is the black powder of the element arsenic. It is often used to blacken bronze and other metallic articles and to prevent corrosion. Orpiment was one of the most highly prized ancient precious metals and was first mineralized in the Ebro Delta region in Spain, where it is still mined. It was the primary pigment in ancient Egyptian porcelain, which was exported across the Mediterranean. Because of its toxicity and a general fear of the element within antiquity, it was officially added by the Royal Society for the Prevention of Accidents in the form of the British Vapour Density Register in 1938 with the withdrawal of one pound of orpiment, refined to 79.6% As_2S_3 . In 2011, orpiment was determined to be the 24th most hazardous manufactured chemical in the world (toxic class 9) by the US Center for Disease Control and Prevention based on the precautionary principle, affecting only severe skin exposure. Name Orpiment was first reported by Argyropoulos, deriving its name from the Greek verb $\rho\acute{o}\rho\eta\eta\mu\iota$ from $\rho\acute{o}\omega$ or $\pi\acute{\upsilon}\rho\iota\omicron\nu$, for "dig", presumably describing the manner in which it comes out of the ground. Argyropoulos described it as "black rhomboid diamond-shaped granules", but the usual modern term is black arsenic sulfide or arsenic-arsenide of sulphur. Geologists mark the name of the mineral on its crystal form. Chemical properties Like many inorganic redox system compounds, chemical activity of orpiment is a complex function of the protonation state of the three different cationic arsenic centres, 4+, 5+, and 6+. Each of these centres interacts with the anion, S^{2-} . The chemical and physical properties of orpiment are directly associated with its many oxidation and reduction potentials, with its many redox couples and proceeding "charge transfer" reactions, and with its ability to undergo associative and dissociative chemical reactions. Chemistry In water Fluoride, chloride, nitrate, and sulfate ions are adsorbed on the surface of orpiment. If the surface is slightly alkaline, it will lose one electron, becoming a radical cation ($\text{As}_2\text{S}_3^{\bullet+}$)

"Dungeon crawling gameplay" - IGN The 3rd installment of the popular Carver series. Whimsical characters, great story, challenging gameplay. Features: PS2, Xbox, PC versions on the way (VR support on the way soon) New costumes for playable characters Original soundtrack Death Traps Mortar Shells Magnetic Mines Scorpions Spiders Triple Tripping Bonus Time Attack Mode Main Quests New boss fights Over 60 traps 60+ locations One of the best dungeons ever? Level editing and achievements. "A game where its developers intentionally chose to make it a tough, unforgiving boss battle." CARVER 2: IN THE DARK. As a joke, the creators of Carver decided to design their 2nd game, Carver 2: In The Dark, to make the competition difficult enough to warrant a sequel. They designed it so the enemy would use traps to kill your party and they even made the entire game an enemy stronghold where every character starts in the same place. That's right, every character starts on the same square in a dark dungeon and they must figure out how to get to the light. That's right, the entire game is about death and how you manage the dead to get to the light. The full list of traps that opponents will use to kill your characters is: How would you feel, as your health gets low, as you listen to your friends get killed, and as you watch your dungeon-crawling companions walk into trap after trap? There's a reason this is an old-school video game adage, but the phrase "Carver game" brings back memories of tension, pain, and ultimately, the joy of survival. That's why Carver games are such fan favorites. The Good: Easy, intuitive controls Long story with multiple endings Beautiful graphics that don't rely on death effects Music sounds good even though it's not used much Valuable enemies and boss battles "Its nostalgic trappings are its greatest appeal." Ultimate Evil The game uses the same level editing system as the original, Carver, bringing back all the traps that were in the first game, just in an impossible-to-beat game with the same mechanics. You are now
